OSU FACULTY READS—SPRING 2026

The Opposite of Cheating: Teaching for Integrity in the Age of AI* by Tricia Bertram Gallant & David A. Rettinger

From the publisher: *The Opposite of Cheating* presents a positive, forward-looking, research-backed vision for what classroom integrity can look like in the GenAI era, both in cyberspace and on campus. Accordingly, the book outlines workable measures teachers can use to better understand why students cheat and to prevent cheating while aiming to enhance learning and integrity.

Many people have been asking us about assessment in the age of GenAI. We think these conversations are important, and this book is receiving rave reviews. Maybe it can help us find answers together!
